

Thinglink – Participant’s Notes:

Why Use Thinglink?

Potential Classroom Uses / Ideas

Obstacles to Overcome

Accessing Thinglink

Create a free Teacher account here: <https://www.thinglink.com/edu>

Setting Up Classes & Students

You can create free accounts for students which don't require their email addresses by clicking on STUDENTS then GROUPS. You can then add a whole class where logins and passwords are automatically generated.

Getting Started

Give students the logins and passwords – you will need to keep these safe (and so will the students)

Steps For Making a Thinglink:

1. Log into your account
2. Click on CREATE
3. You will then need to have a background image for the Thinglink – saved on your computer or you can import from a web address. This forms the interactive image and is a very important part of the Thinglink.
4. Then you can start adding links to your image by following the instructions on the screen. It's easy to search for content here, or you may already have links saved.
5. Once it is saved, you can click on ADD TO CHANNEL which allows you to share it with a particular class group.
